

**FOR IMMEDIATE RELEASE...**

## **Colgate Announces 4th Quarter 2019 Results**

**New York, New York, January 31, 2020...** Colgate-Palmolive Company (NYSE:CL) today reported worldwide Net sales of \$4,015 million in fourth quarter 2019, an increase of 5.5% versus fourth quarter 2018. Global unit volume increased 5.5%, pricing increased 1.5% and foreign exchange was negative 1.5%. The previously disclosed acquisition of the Laboratoires Filorga Cosmétiques ("Filorga") skin health business contributed 2.0% to Net sales and unit volume growth in the quarter. Organic sales (Net sales excluding the impact of foreign exchange, acquisitions and divestments) increased 5.0%.

Net income and Diluted earnings per share in fourth quarter 2019 were \$643 million and \$0.75, respectively. Net income in fourth quarter 2019 included \$27 million (\$0.03 per diluted share) of aftertax charges resulting from the Company's Global Growth and Efficiency Program, \$6 million (\$0.01 per diluted share) of aftertax acquisition-related costs, a \$20 million (\$0.02 per diluted share) aftertax benefit related to a value-added tax matter in Brazil and a \$29 million (\$0.04 per diluted share) tax benefit related to Swiss income tax reform.

Net income and Diluted earnings per share in fourth quarter 2018 were \$606 million and \$0.70, respectively. Net income in fourth quarter 2018 included \$32 million (\$0.04 per diluted share) of aftertax charges resulting from the Global Growth and Efficiency Program.

Excluding charges resulting from the Global Growth and Efficiency Program in both periods and acquisition-related costs and the benefits related to the value-added tax matter in Brazil and Swiss income tax reform in 2019, Net income in fourth quarter 2019 was \$627 million, a decrease of 2% versus fourth quarter 2018, and Diluted earnings per share in fourth quarter 2019 was \$0.73, a decrease of 1% versus fourth quarter 2018.

Gross profit margin was 60.1% in fourth quarter 2019 versus 59.1% in fourth quarter 2018. Excluding charges resulting from the Global Growth and Efficiency Program in both periods and acquisition-related costs in 2019, Gross profit margin was 60.2% in fourth quarter 2019, an increase of 80 basis points versus the year ago quarter as cost savings from the Company's funding-the-growth initiatives and higher pricing were partially offset by higher raw and packaging material costs. Mix, primarily Filorga, was also favorable.

Selling, general and administrative expenses were 35.2% of Net sales in fourth quarter 2019 versus 34.8% of Net sales in fourth quarter 2018. Excluding charges resulting from the Global Growth and Efficiency Program in both periods, Selling, general and administrative expenses increased by 10 basis points versus the year ago quarter to 34.7% of Net sales in fourth quarter 2019 due to increased advertising investment, partially offset by lower overhead expenses, both as a percentage of Net sales. On an absolute basis, worldwide advertising investment increased 13% to \$426 million in fourth quarter 2019 versus \$376 million in the year ago quarter.

Operating profit increased to \$931 million in fourth quarter 2019 compared to \$891 million in fourth quarter 2018. Excluding charges resulting from the Global Growth and Efficiency Program in both periods and acquisition-related costs and the benefit related to the value-added tax matter in Brazil in 2019, Operating profit was \$938 million in fourth quarter 2019, even with fourth quarter 2018. Operating profit margin was 23.2% in fourth quarter 2019 versus 23.4% in fourth quarter 2018. Excluding charges resulting from the Global Growth and Efficiency Program in both periods and acquisition-related costs and the benefit related to the value-added tax matter in Brazil in 2019, Operating profit margin was 23.4% in fourth quarter 2019, a decrease of 120 basis points versus the year ago quarter. This decrease in Operating profit margin was due to an increase in Selling, general and administrative expenses, primarily driven by higher advertising investment, and an increase in Other (income) expense, net, partially offset by an increase in Gross profit, all as a percentage of Net sales. This increase in Other (income) expense, net, includes a write-off of certain investments and fixed assets.

Net cash provided by operations year to date was \$3,133 million compared to \$3,056 million in the comparable 2018 period. Working capital as a percentage of Net sales was negative 1.6% compared to negative 1.7% in the year ago period.

Noel Wallace, President and Chief Executive Officer, commented on the fourth quarter results, “We are very pleased to have ended 2019 with another quarter of sequential improvement in net sales growth and organic sales growth. It is especially encouraging that the strong 5.0% organic sales growth was broad-based, with every operating division contributing to the growth.

"We remain sharply focused on sustaining this growth momentum by continuing to innovate in our core businesses, pursue adjacent categories and expand into new markets and channels. We also continue to invest behind our brands, with our advertising investment increasing this quarter in absolute dollars and as a percent to sales versus fourth quarter 2018.

“Colgate’s leadership of the global toothpaste market continued during the quarter with our global market share at 41.1% year to date. Our global leadership in manual toothbrushes also continued with Colgate’s global market share in that category at 31.6% year to date.”

Mr. Wallace continued, “As we look ahead to 2020, based on current spot rates, we expect 4% to 6% net sales growth and 3% to 5% organic sales growth. This growth reflects our plan to continue to invest behind our brands and our global capabilities.

“We are also excited about expanding our oral care portfolio with the recent announcement of our agreement to acquire Hello Products LLC, one of the fastest-growing, premium oral care brands in the United States. Our guidance includes this acquisition.

“On a GAAP basis, based on current spot rates, we are planning for a year of gross margin expansion, increased advertising investment and a mid to high-single-digit increase in earnings per share.

“Excluding charges resulting from the Global Growth and Efficiency Program, acquisition-related costs and the benefits from the value-added tax matter in Brazil and Swiss income tax reform in 2019, based on current spot rates, we are planning for a year of gross margin expansion, increased advertising investment and a low to mid-single-digit increase in earnings per share.”

At 11:00 a.m. ET today, Colgate will host a conference call to elaborate on fourth quarter results. To access this call as a webcast, please go to Colgate’s website at <http://www.colgatepalmolive.com>.

## Market Share Information

Management uses market share information as a key indicator to monitor business health and performance. References to market share in this press release are based on a combination of consumption and market share data provided by third-party vendors, primarily Nielsen, and internal estimates. All market share references represent the percentage of the dollar value of sales of our products, relative to all product sales in the category in the countries in which the Company competes and purchases data (excluding Venezuela from all periods).

Market share data is subject to limitations on the availability of up-to-date information. In particular, market share data is currently not generally available for certain retail channels, such as eCommerce or certain discounters. The Company measures year-to-date market shares from January 1 of the relevant year through the most recent period for which market share data is available, which typically reflects a lag time of one or two months. The Company believes that the third-party vendors it uses to provide data are reliable, but it has not verified the accuracy or completeness of the data or any assumptions underlying the data. In addition, market share information reported by the Company may be different from market share information reported by other companies due to differences in category definitions, the use of data from different countries, internal estimates and other factors.

## Cautionary Statement on Forward-Looking Statements

This press release and the related webcast may contain forward-looking statements (as that term is defined in the U.S. Private Securities Litigation Reform Act of 1995 or by the Securities and Exchange Commission (SEC) in its rules, regulations and releases) that set forth anticipated results based on management's current plans and assumptions. Such statements may relate, for example, to sales or volume growth, net selling price increases, organic sales growth, profit or profit margin growth, earnings per share levels, financial goals, the impact of foreign exchange volatility, cost-reduction plans, tax rates, new product introductions, commercial investment levels, acquisitions, divestitures, share repurchases, or legal or tax proceedings, among other matters. These statements are made on the basis of the Company's views and assumptions as of this time and the Company undertakes no obligation to update these statements whether as a result of new information, future events or otherwise, except as required by law or by the rules and regulations of the SEC. Moreover, the Company does not nor does any other person, assume responsibility for the accuracy and completeness of these statements. The Company cautions investors that any such forward-looking statements are not guarantees of future performance

and that actual events or results may differ materially from those statements. For more information about factors that could impact the Company's business and cause actual results to differ materially from forward-looking statements, investors should refer to the Company's filings with the SEC (including, but not limited to, the information set forth under the captions "Risk Factors" and "Cautionary Statement on Forward-Looking Statements" in the Company's Annual Report on Form 10-K for the year ended December 31, 2018 and subsequent Quarterly Reports on Form 10-Q). Copies of these filings may be obtained upon request from the Company's Investor Relations Department or on the Company's website at <http://www.colgatepalmolive.com>.

### Non-GAAP Financial Measures

The following provides information regarding the non-GAAP financial measures used in this earnings release and/or the related webcast:

This release discusses Net sales growth (GAAP) and organic sales growth, which is Net sales growth excluding the impact of foreign exchange, acquisitions and divestments (non-GAAP). Management believes the organic sales growth measure provides investors and analysts with useful supplemental information regarding the Company's underlying sales trends by presenting sales growth excluding the external factor of foreign exchange as well as the impact from acquisitions and divestments. See "Geographic Sales Analysis Percentage Changes" for the three and twelve months ended December 31, 2019 vs. 2018 included with this release for a comparison of organic sales growth to Net sales growth in accordance with GAAP.

To supplement Colgate's Condensed Consolidated Statements of Income presented in accordance with GAAP, the Company has disclosed non-GAAP measures of operating results that exclude certain items. Worldwide Gross profit, Gross profit margin, Selling, general and administrative expenses, Selling, general and administrative expenses as a percentage of Net sales, Other (income) expense, net, Operating profit, Operating profit margin, Non-service related postretirement costs, Effective income tax rate, Net income attributable to Colgate-Palmolive Company and Diluted earnings per common share are discussed both as reported (on a GAAP basis) and excluding charges resulting from the Global Growth and Efficiency Program and, as applicable, acquisition-related costs and the benefits related to a value-added tax matter in Brazil and Swiss income tax reform in 2019, the benefit from a foreign tax matter in 2018 and the charge related to U.S. tax reform in 2018 (non-GAAP). These non-GAAP financial measures

exclude items that, either by their nature or amount, management would not expect to occur as part of the Company's normal business on a regular basis, such as restructuring charges, charges for certain litigation and tax matters, gains and losses from certain divestitures and certain unusual, non-recurring items. Investors and analysts use these financial measures in assessing the Company's business performance, and management believes that presenting these financial measures on a non-GAAP basis provides them with useful supplemental information to enhance their understanding of the Company's underlying business performance and trends. These non-GAAP financial measures also enhance the ability to compare period-to-period financial results. See "Non-GAAP Reconciliations" for the three and twelve months ended December 31, 2019 and 2018 included with this release for a reconciliation of these financial measures to the related GAAP measures.

The Company uses these financial measures internally in its budgeting process, to evaluate segment and overall operating performance and as factors in determining compensation. While the Company believes that these financial measures are useful in evaluating the Company's underlying business performance and trends, this information should be considered as supplemental in nature and is not meant to be considered in isolation or as a substitute for the related financial information prepared in accordance with GAAP. In addition, these non-GAAP financial measures may not be the same as similar measures presented by other companies.

The Company defines free cash flow before dividends as Net cash provided by operations less Capital expenditures. As management uses this measure to evaluate the Company's ability to satisfy current and future obligations, repurchase stock, pay dividends and fund future business opportunities, the Company believes that it provides useful information to investors. Free cash flow before dividends is not a measure of cash available for discretionary expenditures since the Company has certain non-discretionary obligations such as debt service that are not deducted from the measure. Free cash flow before dividends is a non-GAAP measure and may not be comparable to similarly titled measures reported by other companies. See "Condensed Consolidated Statements of Cash Flows" for the twelve months ended December 31, 2019 and 2018 for a comparison of free cash flow before dividends to Net cash provided by operations as reported in accordance with GAAP.
